This text is for questions 21 and 22.

Once, a cap seller was passing through a jungle. He was dead tired and needed to rest. Then, he stopped and spread a cloth under a tree. He placed his bag full of caps near him and lay down with his cap on his head.

The cap seller had a sound sleep for one hour. When he got up, the first thing he did was to look into his bag. He was startled when he found all his caps were not there. He was wondering where they could have gone. Indeed, he was greatly puzzled.

When he looked up the sky, he was very surprised to see monkeys sitting on the branches of a tree, each wearing a cap on his head. They had evidently done it to imitate him.

He decided to get his caps back by making a humble request to the monkeys. In return, the monkeys only made faces of him. When he began to make gestures, even when he raised his fist towards them to threaten them, they also imitated him.

At last he hit upon a clever idea. "Monkeys are a great imitator," he thought. So he took off his own cap and threw it down on the ground. As he had expected, all the monkeys took off the caps and threw them down on the ground. Quickly he stood up and collected the caps, put them back into his bag and went away.

21. Why was each monkey wearing a cap on their head?
- A. They liked them.
 - B. They liked wearing caps.

This text is for questions 23 to 25.

Raja Ampat or 'Four Kings', is the name given to some islands in West Papua and comes from a local myth. The four major islands are Waigeo, Misool (which is home to ancient rock painting), Salawati, and Batanta. Raja Ampat is located in the bird head of the island of Papua. Underwater enthusiasts flock to this region because it offers the world's best marine sight. In the Raja Ampat islands, divers can explore vertical underwater walls. The thrill of drift diving is another great challenge.

The territory within the islands of the Four Kings is enormous, covering 9.8 million acres of land and sea, home to 540 types of corals, more than 1,000 types of coral fish and 700 types of mollusks. This makes it the most diverse living library for world's coral reef and underwater biota. According to a report developed by The Nature Conservancy and Conservation International, around 75% of the world's species live here.

When divers first arrive here their excitement is palpable. It's common to hear people praise God as they take in the remarkable scenery. Others prefer to remain in silence taking in the overwhelming sight of so many islands with crystal clear water that softly brushes over the white sandy beaches.

23. The text is about the ... of Raja Ampat.
- A. size of the islands
 - B. scenery on the islands
 - C. natural habitat
 - D. flora and fauna
 - E. underwater beauty

The following text is for questions 28 to 30.

Photosynthesis is the process of converting solar energy to chemical energy and storing it in bonds of sugar. This process occurs in plants and some algae (Kingdom Protista). Plants need only solar energy, CO₂ and H₂O to make sugar. The process of photosynthesis takes in the chloroplasts, specifically using chlorophyll, the green pigment involved in photosynthesis.

Photosynthesis takes place primarily in plant leaves, and little to none occurs in stems, etc. The parts of a typical leaf include the upper and lower epidermis, the mesophyll, the vascular bundle(s) (veins), and the stomates. The upper and lower epidermal cells do not have chloroplasts, thus photosynthesis does not occur there. They serve primarily as protection for the rest of the leaf. The stomates are holes which occur primarily in the lower epidermis and are for air exchange: they let CO₂ in and O₂ out. The vascular bundles or veins in a leaf are part of the plant's transportation system, moving water and nutrients around the plant as needed. The mesophyll cells have chloroplasts and this is where photosynthesis occurs.

As you hopefully recall, the parts of a chloroplast include the outer and inner membranes, intermembrane space, stroma, and thylakoids stacked in grana. The chlorophyll is built into the membranes of the thylakoids.

Chlorophyll looks green because it absorbs the red and blue light, making these colors unavailable to be seen by our eyes. It is the green light which is not absorbed that finally reaches our eyes, making chlorophyll appear green. However, it is the energy from the red and blue light that are absorbed that is, thereby, able to be used to do photosynthesis. The green light we can see is not/cannot be absorbed by the plant, and thus cannot be used to do photosynthesis.

28. What is the function of the upper and lower epidermis?
- To let CO₂ in and O₂ out.
 - To enable photosynthesis.
 - To absorb leaf green lights.
 - To protect the rest of the leaf.
 - To transport the nutrient.
29. What is the main idea of paragraph 4?
- The plants can be colorfull in absorbing the photosynthesis process.
 - Photosynthesis needs absorbtion of colors.
 - The energy to do photosynthesis is provided not by the green light.
 - Chlorophyll enables photosynthesis to absorb colors.
 - Photosynthesis process gives colors to the plans.
30. The passage indicates that photosynthesis takes place in
- the veins
 - the stomates
 - the membranes
 - the epidermis
 - the mesophyll

This text is for questions 33 to 35.

Smoking is dangerous for people, not only for smokers themselves, but also for people around them who are called passive smokers.

Smokers have risks of suffering from cancer, heart diseases, including heart attack, breathing problems, cough/sore throat. This is because there are more than 4,000 chemicals found in cigarettes, 250 are toxic poisons and 50 cause cancer. Some other chemicals found in tobacco include: Ammonia, Arsenic, Polonium 210, Carbon Monoxide, and Acetone. Nicotine remains in the body for 8 to 12 hours after a single use of tobacco.

The smoke which arises when a person is smoking a cigarette is very hazardous, and the smoke of bidi or cigar is even more hazardous to passive smokers who inhale the smoke in the vicinity of active smokers. The smoke inhaled by the former is unfiltered thereby causing more ill effects. Several pulmonary diseases such as cough, bronchitis, asthma and last but not the least carcinoma of lungs may occur as a consequence of breathing in cigarette or cigar smoke.

33. What remains in the body for 12 hours after a person smokes?
- Arsenic.
 - Nicotine.
 - Polonium.
 - Ammonia.
 - Acetone.
34. According to the text, smokers have risks of suffering from cancer because
- they breathe in so many harmful chemicals
 - they inhale too much smoke
 - their body can not stand dangerous smoke
 - they are not strong enough to inhale smoke
 - they are passive smokers
35. "The smoke of bidi or cigar is more hazardous to passive smoker". (Paragraph 3)
The underlined word can be replaced by
- dangerous
 - serious
 - nutritious
 - disadvantageous
 - mischievous

This following text is for questions 36 to 38.

There are many arguments in favor of a boarding school education. Nevertheless, the boarding school is not always the best education institution for everyone.

At an early age interacting and communicating with people is very important for a child's personal life and can be especially helpful for his/her future. In a boarding school, shy children can take advantage of interaction through communal activities. The boarding school also offers a great variety of activities such as arts, sports, and music that allow children to demonstrate and develop specialized skills in their free time.

Furthermore, the structured way of life and strict rules at the boarding school may help students to get used to a well ordered way of life. The manners and social skills will help them to become more responsible and confident, and to develop their talents in leadership. Professionally trained teachers and educators in the boarding school can offer excellent education without the parents' constant supervision.

In spite of these good points, it is not advisable to send a child to a boarding school if he/she is a dependent learner. A boarding school usually demands that student learn independently. In addition, the boarding school should not be seen as a measure to solve inappropriate behaviour or unsatisfactory study performance. Instead of improving, problematic children may close off their relationship with their peers and teachers.

In conclusion although a boarding school may provide good education to many children, it is not recommended for those who are strongly attached to their families. They may become frustrated and socially isolated.

36. According to the writer, children in a boarding school can develop specialized skills in
- entrepreneurship
 - community service
 - reading
 - drama
 - music
37. Why does parents send their children Boarding School? Because
- it is good for shy children
 - it gives good education for adults
 - interacting and communicating with people is very important
 - it does not allow children demonstrate excellence and develop their skills
 - it is safe and makes children become responsible and develop talents in leadership
38. From the text, we can conclude that
- the boarding school can be very expensive
 - there are good and bad boarding schools
 - the boarding school is the solution to our educational problems
 - it's not necessary to send children to a boarding school because the students can live independently
 - not everyone thinks that the boarding school is the best educational institution for children

This text is for questions 39 to 41.

A laptop is a kind of computer unit which has the same function as a PC (personal computer), but it is smaller, lighter and of different sizes. Nowadays, most people choose laptops for several reasons.

A laptop is a portable device. This portability is very helpful for our work, study and other activities. We do not need complicated cable installations to activate a laptop, and with a laptop, we can do our work anytime anywhere.

Moreover, a laptop allows us to access the internet in public places which provide free access called hot spot areas. Some people like to use this facility to carry out their tasks.

Finally, a laptop consumes energy more efficiently than a PC does. This device uses a rechargeable battery as a source of electric energy. So if we prefer using a laptop, it means that we support the government program to save energy.

That's why a laptop has become very popular recently.

'Laskar Pelangi': The Audacity of Hope

This is a movie adapted from a best-selling Indonesian novel. It took 40 days of filming on Belitung Island, Bangka-Belitung province. Involving 12 local actors, it reportedly cost Rp 8 billion. With all the efforts of transforming *Laskar Pelangi* (Rainbow Warrior) into a moving picture, will it satisfy readers' imaginations?

Laskar Pelangi, the novel, was written by Andrea Hirata in 2005, based on his own experiences. It is about an inspiring teacher and her 10 students in the poverty-stricken Kampung Gantong in Belitung. The poor condition of their school building does not dampen their high spirits and hopes for a better future.

Two years later, the novel became a phenomenon in Indonesian literature. With its humanistic touch, *Laskar Pelangi* has sold more than 500,000 copies and has won the position of Must-Read Novel in every corner of the nation's bookshops and media review pages. It has finally overcome the domination of teen-lit, chick-lit and even religious novels, the popular theme of today.

Andrea entrusted the filming of the story to the respected figures in the film industry, Mira Lesmana and Riza, as producer and film director. In July 2007, Mira and Riri started the pre-production, which took a year to finish. Together with the scriptwriter Salman Aristo they decided to create a different scenario for the film.

45. What is the main idea of the second paragraph?
- 'Laskar Pelangi' is the story of poor people at the Bangka Belitung province.
 - 'Laskar Pelangi' is the story of poor school children of the Belitung Island.
 - 'Laskar Pelangi' is about poverty in Kampung Gantong in Bangka Belitung.
 - 'Laskar Pelangi' is about an inspiring story towards a better life.
 - 'Laskar Pelangi' is about Andrea Hirata.
46. From the text above, we know that
- the movie was played by poor children
 - Andrea Hirata is the producer of *Laskar Pelangi*
 - the novel of *Laskar Pelangi* was a phenomenal work of literature
 - people like the movie better than the novel
 - people like the novel better than the movie
